Sequence 6, Application US/08911423

Sequence 6, Application US/08911423

Patent No. 6111090

GENERAL INFORMATION:

APPLICANT: Randall, Troy D.

APPLICANT: ALlotnik, Albert

TITLE OF INVENTION: RAMMALIAN CELL SURFACE ANTIGENS; RELATED

TITLE OF INVENTION: REAGENTS

NUMBER OF SEQUENCES:

CORRESPONDENCE ADDRESS:

ADDRESSEE: DNAX Research Institute

STREET 901 California Avenue

CITT: Palo Alto

STATE: California
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Query Match
